

Accomplishment Report

September 2, 2024 – September 13, 2024

Internal Chat System and Buildhub

Internal Chat System

Objective:

- Focused on enhancing functionality and fixing issues within the Buildhub Internal Chat application to improve user experience and performance.

Tasks Completed:

1. **Global Search Bug Fix**
 - i. Addressed and resolved issues affecting the global search functionality, ensuring accurate and reliable search results.
2. **Global Search Additional Feature (Conversation Name)**
 - i. Added a new feature to the global search to include conversation names, improving user ability to find specific conversations.
3. **Bug Fixes in E-Chat**
 - i. Implemented various fixes to resolve bugs reported in the E-Chat module, enhancing overall stability and performance.
4. **Scrolling Bug Fix for iOS v17.6.1**
 - i. Corrected scrolling issues specific to iOS version 17.6.1, ensuring smooth and consistent scrolling behavior.
5. **Mobile Optimization**
 - i. Optimized the chat application for mobile devices, improving usability and performance across various screen sizes and orientations.

Buildhub

Objective:

- Concentrated on automating notifications and improving data handling within the Buildhub.ph platform to streamline processes and enhance operational efficiency.

Tasks Completed:

1. **Automated Buildcredit Due Date Text Messages**
 - Set up automated text message notifications for Buildcredit due dates, ensuring timely reminders to users.
2. **Automated Inactive Customer Texts**
 - Implemented automated texts for inactive customers to re-engage them and potentially increase activity.
3. **Automated Buildcredit Balance Text Messages**
 - Created an automation for sending text messages regarding Buildcredit balance updates, keeping users informed of their current balance.
4. **Per Order Placed Text Message**
 - Established a system to send text messages for each order placed, providing immediate confirmation to users.

5. Buildcredit Interest Credit Memo

- Developed a process for generating and sending interest credit memos related to Buildcredit accounts.

6. Number Formats in Buildcredit Payments

- Adjusted number formatting in Buildcredit payments to ensure clarity and consistency in financial transactions.

7. Seller Dashboard Controllers in API

- Enhanced API functionality to include controllers for managing the Seller Dashboard, improving integration and data management.

8. Buildcredit Payments Admin Logs

- Implemented logging for Buildcredit payments admin actions to better track and audit payment-related activities.
