

## Accomplishment Report

*Aug 12, 2024 - Aug 30, 2024*

### Releasing App/Drivers App Enhancement/Buildhub-Chat/Customer App.

Releasing And Drivers Application.

Objective:

- Detailed images attachment/Fixing Image Uploading

Task Completed

- **Changing UI for images attachment:** In Releasing/Driver App. image attachments are now detailed, every fields has detailed description of what type of image required to be attached
- **Adding new images to Received And Delivered Orders:** in both app, drivers and warehouse man are now able to upload new image to all fulfilled orders(Received/Delivered). Once a new image attached, date and time will display beside attached image.
- **Adding Pop-up message:** once the order has been fulfilled a pop-up message will show.
- **Fixing image upload bug:** modifying the code, to avoid failing of uploading images.
- **Backlog Order:** All backlog orders can now be seen in the releasing app.

Internal Chat Mobile Application/B-Chat

Objective:

- Integrating API Endpoints/Enhancing Code

## Task Completed

### API Integration:

- **Add new member in existing Group Chat:** user admin who created group chat can dynamically add members to existing group chat.
- **Mentions feature:** user are able to mention a member that belongs to the group chat.
- **Enhanced sending message:** sending a message without any laggy feels.

## Buildhub Customer App

### Objective:

- **Integrating API Endpoints/Enhancing Code/Finalizing as soon as possible**

## Task Completed

- **Adjusting code for new API endpoint:** some part of the app crashed due to changes in API endpoints,
- **Enhancing code:** Enhancing code to avoid future errors.
- **Calculate Build Shipping:** once the buildhub shipping is selected it will automatically calculate the shipping fee.
- **Check out with bank transfer payment option:** as of now only bank transfer payment option is only available, other payment option is underdevelopment.
- **Integrating Transpotify And Lalamove Shipping option(Ongoing):** as of now I am working to integrate these shipping fees.

- **Order History:** Order history is now available in the customer app to track orders, whether they are pending, fulfilled, to be delivered, denied, or canceled.
- **Avoiding adding new order to cart from different seller:**  
Just same as the website customers are not able to order items from different sellers. This function is now implemented to the app.
- **Filter Product By category/ sort to lowest or highest price:**  
Filtering products and sort them to lowest order highest price, is now implemented to the app.
